Over the past 150 years, the International Committee of the Red Cross (ICRC) has produced a series of legal commentaries on the cornerstone treaties of international humanitarian law, including notably the Geneva Conventions (GCs) and their Additional Protocols (APs), to support their interpretation and implementation. This timeline follows the publication of the ICRC Commentaries, from the first treaties written in French by late 19th – early 20th century ICRC experts to the current project to update the Commentaries on the 1949 GCs and their APs.
