### Civilization and torture : beyond the medical and psychiatric approach / Marcelo N. Viñar

Document type:	Article
Title:	Civilization and torture : beyond the medical and psychiatric approach
Author zone:	Marcelo N. Viñar
Host item entries:	International review of the Red Cross,
Languages:	English
Abstract:	The author argues that torture affects not only its victims, and also that torture is not a disease of the victim but an endemic illness of civilization which has the effect of shattering the social network that makes us human. In order to rebuild healthy social relationships, it is vital to detect and accept the existence of this invisible pathology. We must listen to the intense groan of torture victims and understand them if we are to dare to look at the oppressive order which destroys them.
