### Applying IHL targeting rules to practical situations : proportionality and military objectives / William J. Fenrick

Document type:	Article
Title:	Applying IHL targeting rules to practical situations : proportionality and military objectives
Author zone:	William J. Fenrick
Host item entries:	Windsor yearbook of access to justice,
Languages:	English
General Note:	Photocopies
Abstract:	The IHL targeting rules are framed in relatively abstract terms and there is, unfortunately, no general agreement concerning precisely which objects constitute military objectives and concerning the relative values to be assigned to civilian losses and military advantages when computing the proportionality equation. The author encourages the development of a dialogue between all informed and interested parties, based in large part on case studies, to clarify the concepts.
Authors:	Fenrick, William J.
Keyword in English:	PRINCIPLE OF PROPORTIONALITY MILITARY TARGET DEFINITION
Keyword in French:	PRINCIPE DE PROPORTIONNALITE OBJECTIF MILITAIRE DEFINITION
