How cyber changes the laws of war / Jack Goldsmith

Document type:	Article
Title:	How cyber changes the laws of war
Author zone:	Jack Goldsmith
Host item entries:	European journal of international law = Journal européen de droit international,
Languages:	English
General Note:	Contribution dans le cadre du symposium : Just and unjust warriors : marking the 35th anniversary of Walzer's Just and unjust wars
Abstract:	Michael Walzer's Just and Unjust Wars anticipated many problems and developments in the laws of war, but it understandably did not anticipate how the Internet and associated computer and telecommunications revolutions would change war or the laws that govern it. This article seeks to assess, in general terms, the ways that the rise of cyber exploitation and cyber attacks challenge prevailing conceptions of the laws of war.
