The ante-mortem/post-mortem database : an information management application for forensic data / ICRC

Document type:	Book
Subtype of document:	Plaquette
Title:	The ante-mortem/post-mortem database : an information management application for forensic data
Author zone:	ICRC
Editor:	Geneva : ICRC, December 2013
Physical description:	11 p. : ill. ; 21 cm
Series:	In brief
Languages:	English
Abstract:	The proper management of forensic data is crucial for identifying human remains and resolving cases of disappearance. This brochure describes the AMPM Database, an electronic tool that facilitates the identification of remains by supporting the archiving, standardization, reporting, searching, and analysis of forensic data.
