Editor:	Geneva : ICRC, April 2013
Physical description:	103 p. : fotogr. ; 21 cm
Series:	Reference (ICRC)
Languages:	English
Abstract:	A guidance document in simple language for health personnel, setting out their rights and responsibilities in conflict and other situations of violence. One surgeon who reviewed the text said: "It's what I wish I'd had in my pocket when I first went into the field as a surgeon with the ICRC." It explains how responsibilities and rights for health personnel can be derived from international humanitarian law, human rights law and medical ethics.
