Title:	Cyber war and the law of neutrality
Author zone:	David Turns
In:	Research handbook in international law and cyberspace
Editor:	Cheltenham ; Northampton : Edward Elgar, 2015
Physical description:	p. 380-400
Languages:	English
Abstract:	In this chapter, David Turns assesses the application of the law of neutrality to cyberspace. Turns explains that this is a complicated process because the law of neutrality was devised more than a century ago and was therefore constructed with the intention of protecting the territorial sovereignty of neutral states, namely tangible constructs such as physical territory, territorial waters and territorial airspaces. In contrast, cyberspace is an intangible and interconnected environment. This considerably enhances the potential for operations in cyberspace to implicate third parties. Turns concludes that the law of neutrality is still relevant to cyberspace by analogy and proceeds to examine how neutrality affects the conduct of cyber operations by neutrals and belligerents.
