| Languages:            | English   |
| Abstract:             | This document is intended to assist governments, mine action professionals and others to develop national legislation to coordinate and regulate "mine action" in a country affected by landmines and/or unexploded ordnance (UXO). It identifies the principal elements to be included in such a law and the issues which should be considered in its preparation. |
