Title:	Keeping schools safe from the battlefield : why global legal and policy efforts to deter the military use of schools matter
Host item entries:	International review of the Red Cross,
Author zone:	Bede Sheppard
Language(s):	eng
Abstract:	This article describes how schools are used for military purposes in today's conflicts. It summarizes the latest data on the practice, before explaining how the military use of schools harms students' and teachers' safety and impedes students' right to education. The article concludes by examining the diverse legal and military responses to this practice, and the foundation they lay for the 2015 Safe Schools Declaration and for further action.
